The quality and reliability that your business needs

Saving money may be important to your business, but it can't be done at the expenses of the reliability of your voice and data services. Thanks to the end-to-end control Clearfly exerts over its network infrastructure, ClearPhone™ delivers the reliability you have come to expect from your traditional voice service, yet it benefits from the inherent lower cost of an IP-based solution. In addition, you will often experience a clarity in the voice conversation that you have never imagined possible from a phone service.

15 reasons to keep your phone system

Business Voice-over-IP comes in different flavors; however most solutions fall in two different main categories: so called *hosted voice* and *SIP Trunks*. If you are considering upgrading your voice service to an IP-based solution, the following table may help you decide what type of service is right for you. . Please call Clearfly at (888) 652-7520 or email info@clearfly.net to find out more about the solution that best fits your needs.

| | Hosted Voice | ClearPhone™ SIP trunks |
|---------------------------|---|--|
| Cost effectiveness | <ul style="list-style-type: none"> ☞ You must dispose of your existing phone system and purchase new IP phones ☞ Most solutions are priced on a flat per-user basis. You pay regardless of actual aggregate usage. | <ul style="list-style-type: none"> ☞ Leverage your investments in your existing phone system (whether you own an IP PBX or a legacy one). Support analog phones ☞ Priced on a per-line basis, which means your costs better reflect your company's actual aggregate usage. |
| Productivity | <ul style="list-style-type: none"> ☞ You need to re-train users to a completely different interface, different keystrokes etc. ☞ Often causes significant disruption and downtime during transition. ☞ Fewer features than most of today's PBXs ☞ Less control in the hands of your IT staff. | <ul style="list-style-type: none"> ☞ No need to re-train user. SIP trunks are completely transparent to users ☞ No downtime during transition. Transition often only requires minutes and is mostly invisible to users. ☞ Your IT staff has more control over features and usage policies |
| Quality | <ul style="list-style-type: none"> ☞ Most solutions do not offer end-to-end Quality-of-Service (QoS) management. Quality is variable depending on data traffic. | <ul style="list-style-type: none"> ☞ Clearfly products always include end-to-end QoS management. Quality is as high as traditional voice service, and constant, regardless of data traffic. |
| Support | <ul style="list-style-type: none"> ☞ You must rely on provider's (often understaffed) call center for support. Limited/no support available in the field. | <ul style="list-style-type: none"> ☞ Available through thousands of qualified PBX resellers in the field. |
