

YOUR EXISTING PHONES AND PHONE SYSTEM. RECONNECTED. REVITALIZED.

## Telesphere **Connect**™

### ■ NOW YOU CAN:

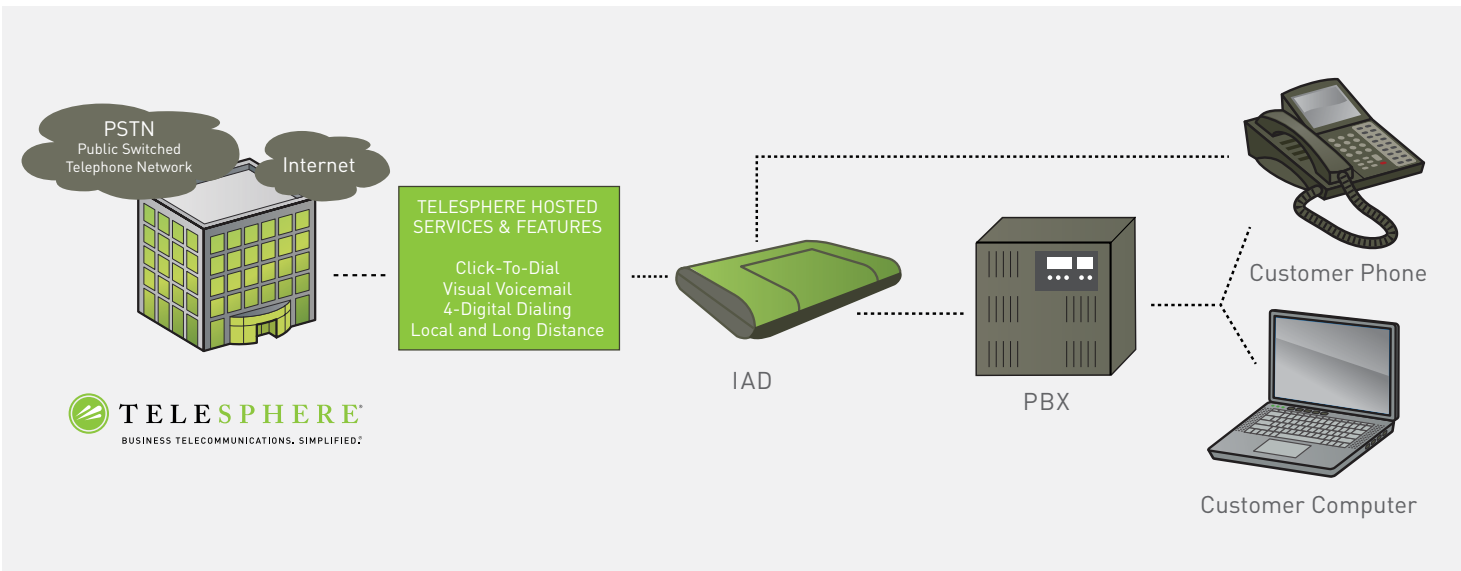

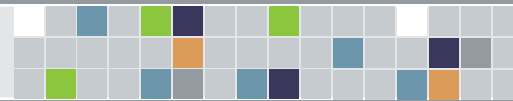

- » **Connect seamlessly with your current assets** – We use analog lines, digital or PRI trunks and SIP trunking to interface with the phones and phone system you already own.
- » **Access advanced telecom features** – Simultaneous ring, unified messaging and click-to-dial are just a few of the productivity-boosting features you receive with Telesphere.
- » **Enjoy fast connection speeds and enhanced performance** – Our connection uses less bandwidth per voice line and supports 48 simultaneous calls, providing double the capacity of a traditional line.
- » **Rely on 24x7 customer support** – Our team of engineers not only is available to you around the clock but also is committed to first-call resolution.
- » **Never miss a call, even in disasters or outages** – A secure, power-protected environment and built-in redundancy prevent any interruption to your service, so your customers can still reach you at all your designated locations.

- **Telesphere Connect gives you the T-1 connection your business needs to realize the benefits of a fully managed, fully hosted PBX solution. Enjoy turnkey phone and Internet service, plus industry-leading user and system features, without removing or replacing your existing phones and phone system.**

**TELESPHERE**®
