

FOR IMMEDIATE RELEASE

Clearfly Certifies Grandstream's UCM6100 series IP PBX Appliance on SIP Trunking Service

Boston, MA and San Francisco, CA (November 11th, 2013) – SIP Trunk provider Clearfly today announced certification of Grandstream Networks UCM6100 series IP PBX Appliance with their Clearphone SIP Trunking service. Customers and resellers can now seamlessly deploy Grandstream's UCM6100 series IP PBX Appliance with [Clearfly's Clearphone SIP Trunking service](#) to easily create a top-notch voice, video, data, and mobility solution for business or residential use.

"We are very excited to announce certification of our Clearphone SIP Trunking service with Grandstream's UCM6100 series IP PBX Appliance," said Chris Hunter, Vice President of Sales for Clearfly. "We feel this certification offers a great opportunity for Clearfly and Grandstream as there is a natural fit between the two company's products and our relationship will greatly benefit our mutual customers and Partners. We can't wait to get started!"

[Grandstream's UCM6100 series IP PBX Appliance](#), which comes in 4 models depending on FXO ports and concurrent calls needed, offers Clearfly customers a set enterprise-grade communications features in an easy-to-manage platform with no licensing fees at a market leading price point. The UCM6100 series runs the popular and very stable Asterisk platform and can be setup, managed, and fully customized using an intuitive web user interface - which allows the UCM6100 series to be managed and even setup remotely. The UCM6100 series includes hundreds of Enterprise-grade IP PBX features, such as multi-level IVRs, auto-attendant, call queues, Call Detail Reporting (CDR), automatic call recording, call-routing, multiple location peering, and voicemail/fax forwarding to email – all without the licensing fees or recurring costs that other manufacturers regularly charge. All future feature additions and firmware upgrades are also included at no extra cost for the life of the product.

Clearfly's solutions come in flat-rate data and voice packages with unlimited domestic long distance, and are specifically designed for the needs of companies with 5 to 500 employees. The services feature all the reliability and quality of traditional voice, bundled with the performance and functionality of dedicated high-speed Internet access. A map of Clearfly's new market coverage is available at http://clearfly.net/service_availability.html, together with a query to check for service availability at a specific location.

"Grandstream is thrilled to offer our popular UCM6100 series IP PBX Appliance to Clearfly's customers," said David Li, CEO of Grandstream. "Clearfly's SIP Trunking services are the ideal fit for Grandstream's UCM6100 series as both products strive to make IP communications more accessible and more affordable for business and residential users than ever before. We look forward to a long and successful partnership with Clearfly."
