

# Why Grandstream's GXP2200 Android IP Phone

1

## THE POWER OF ANDROID

*Use the same Android operating system you know & love on your IP Phone*

The GXP2200 brings the power, flexibility, and familiarity of the Android operating system to the desktop IP phone, offering users unprecedented access to Android apps and functionality. The GXP2200 offers users the same look and feel as any Android device. With direct access to the Google Play Store, you can download the same Android apps you already know and love from smartphone or tablet use to increase business or personal productivity.

2

## CREATE CUSTOMIZED ANDROID APPS

*Users & developers can create custom Android apps to fit any purpose*

The GXP2200 was built to run an OPEN version of the Android operating system, which enables users and developers to create their own customized Android applications to run on the GXP2200 and any Android device to suit the needs of any business, customer, or employee. Use Google's open-source API to write, develop, test, and create your own Android apps for the GXP2200. Developers can combine Google's API with Grandstream's SDK kit to create applications that tap into the powerful IP telephony calling features built into the GXP2200.

3

## A SEAMLESS USER EXPERIENCE

*Be more productive with Bluetooth, Voice Activation, a touch screen, and more*

The GXP2200 features a number of popular Android and mobile functions that make the phone incredibly intuitive to use. Integrated Bluetooth allows users to use Bluetooth headsets, speakers, and keyboards with the GXP2200. Connect an approved 3rd party USB camera and Bluetooth speaker to create a powerful conferencing solution. The GXP2200 features the same capacitive touch screen found on popular mobile phones and tablets, allowing users to operate the phone with familiar swiping, pinching, and dragging motions. Built-in voice activation apps allow users to make calls or launch apps on the phone simply by talking to the GXP2200.

4

## INSTANT WEB ACCESS AT THE TOUCH OF A FINGER

*The GXP2200 serves a second computer on your desk*

The GXP2200 features an integrated web browser, offering users instant access to everything the internet has to offer at the touch of a finger. Email, calendar, and apps such as GoToMeeting can be run on your GXP2200 - offering a powerful productivity engine. Sync your Google account with the GXP2200 to access your email, calendar, contacts, and more.

5

## MAKE CALLS QUICKLY AND EASILY

*The Available extension module put all your contacts at your finger tips*

The available GXP2200 Extension Module makes the phone ideal for secretaries and executives alike. It features a very easy to read 128x384 graphic LCD screen and 20 programmable buttons - each with dual color LED lights. Each extension module can be set to use up to 2 pages of contacts, which allows up to 40 contacts per extension module. You can connect up to 4 extension modules to each GXP2200, allowing for easy access to up to 160 contacts. The extension modules are fully powered by the GXP2200 and support traditional calling features on each programmable button.

6

## A POWERFUL, HIGH-END IP PHONE

*The GXP2200 is loaded with advanced IP calling features*

At its core, the GXP2200 is a powerful, high-end IP phone with a full suite of advanced VoIP calling features. The phone is a 6-line IP phone featuring dual Gigabit ports, integrated Bluetooth, integrated PoE, superior HD audio quality, a USB port and SD card reader, a 1000 person contact book, 5-way conferencing, and available extension modules. The GXP2200 includes the most advanced security protection available, SRTP and TLS encryption, in addition to a Failover SIP server.
