

FOR IMMEDIATE RELEASE

GRANDSTREAM UCM6100 SERIES IP PBX APPLIANCE RECEIVES 2014 *INTERNET TELEPHONY* PRODUCT OF THE YEAR AWARD

*Enterprise-grade IP PBX With Voice, Data, Video and Mobility Apps for SMBs and No Licensing fees
Recognized for Innovation*

Boston, MA (February 11, 2014) – – [Grandstream Networks](#), the leading manufacturer of IP voice/video telephony and video surveillance solutions, announced today that [TMC](#), a global, integrated media company, has named the UCM6100 series IP PBX Appliance as a recipient of a 2014 *INTERNET TELEPHONY* Product of the Year Award.

“It’s an honor to have TMC recognize the market applicability and innovation that the UCM6100 series IP PBX provides to small and medium-sized businesses (SMBs) seeking an affordable, enterprise grade communications solution,” said David Li, CEO of Grandstream.

The [UCM6100](#) series is a revolutionary IP PBX for the SMB market as it offers state-of-the-art enterprise-grade voice, video, data, and mobility features in an extremely easy-to-manage fashion with no licensing fees or costs per feature. SMBs can now compete with larger companies because the UCM6100 series helps to ease the key factors SMBs usually face when purchasing an on-site IP PBX solution including feature content, cost, ease of installation and maintenance, customer application, total cost of ownership, reliability and support. Available in 4 model sizes and based upon an enhanced version of the popular open source Asterisk platform, Grandstream’s UCM6100 series is a powerful IP PBX appliance that supports up to 500 users, 60 concurrent calls, 6 conference bridges, and 32 conference participants. For the starting price of an entry-level PC, the UCM6100 incorporates advanced voice, video, data, and mobility features typically found in expensive IP PBX systems for larger enterprises but offers them in an innovative, extremely easy to use fashion at a potentially disruptive market-leading price point for the SMB market.

“It gives me great pleasure to recognize the UCM6100series IP PBX with a 2014 Product of the Year Award for its commitment to excellence and innovation,” said [Rich Tehrani](#), CEO, TMC. “In the opinion of our distinguished judges, UCM6100 series IP PBX has proven to be among the best communications and technology solutions on the market in 2014. I look forward to continued innovation from Grandstream.

The winners of the 2014 *INTERNET TELEPHONY* Product of the Year are featured in the January/February 2014 issue of *INTERNET TELEPHONY* magazine and online at [www.itmag.com](#).
