IntelliFocus Camera AI

IntelliFocus

- Smooth screen switching with fast and stable camera tracking.
- Enhance meeting concentration and maintain focus on the speakers
- Providing a superior face-to-face conversation experience.

IntelliFocus displays close-ups of **the last 4 active speakers** separately, allowing more participants to appear on the screen and engage fully with the remote participants, thereby making the meeting more realistic.

IntelliFocus Camera AI

IntelliFocus

- Smooth screen switching with fast and stable camera tracking.
- Enhance meeting concentration and maintain focus on the speakers
- Providing a superior face-to-face conversation experience.

IntelliFocus displays close-ups of **the last 4 active speakers** separately, allowing more participants to appear on the screen and engage fully with the remote participants, thereby making the meeting more realistic.

Video Fence

Block outside distractions, perfect for **open space**.

AI Functions Involved:

- Auto-Framing
- Speaker Tracking
- Virtual Background
- Multi-Focus
- Picture-in-Picture
- IntelliFocus

Supported Models:

- Smartvision 40/UVC86

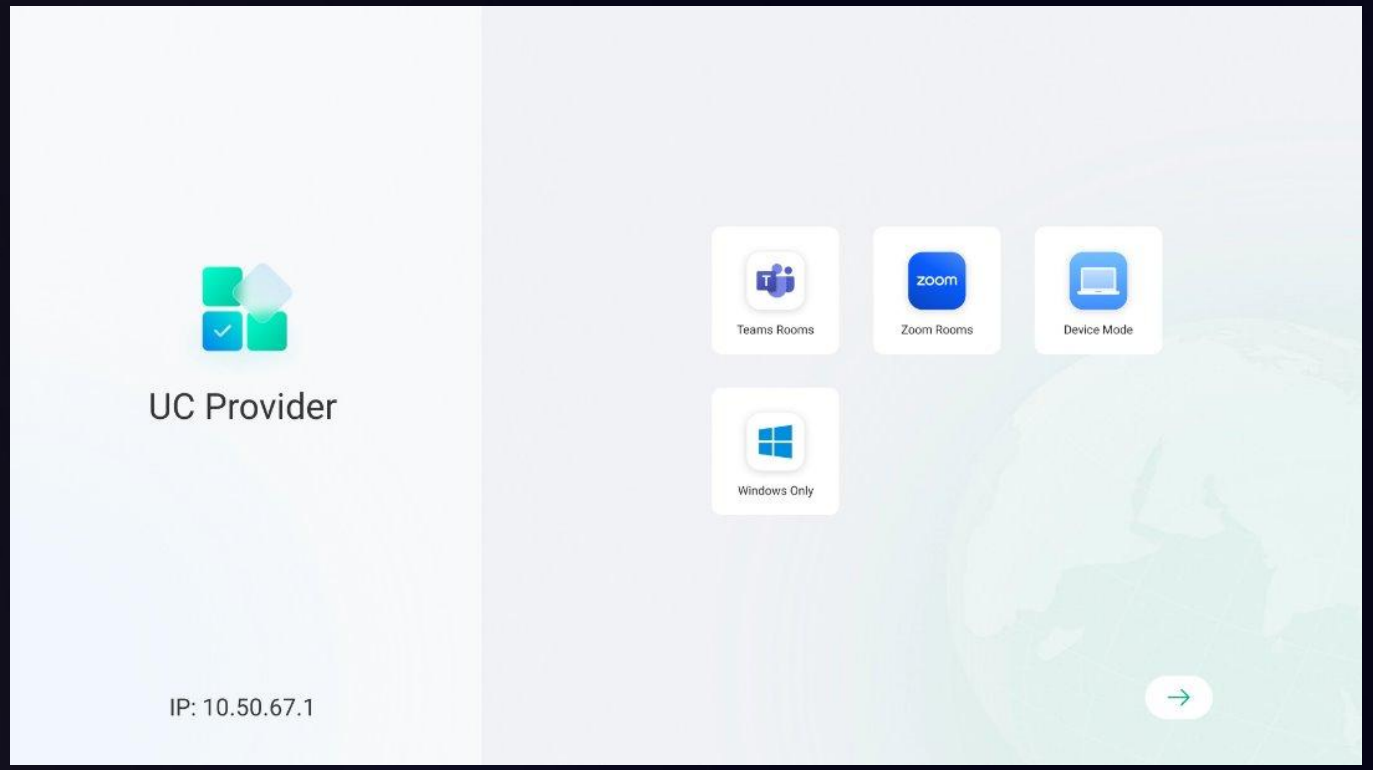

If the meeting room is not enclosed or has transparent glass walls, the camera might pick up people walking outside or focus on the pictures, causing framing issues. With Video Fence, users can create a specific area where AI features and AI-enhanced audio only function.

Yealink All Android-based devices now support MDEP

- Security
- Reliability
- Manageability
- Future-proof
