

FOR IMMEDIATE RELEASE

GRANDSTREAM UCM6100 SERIES IP PBX APPLIANCE ADDS ANOTHER AWARD WITH 2014 UNIFIED COMMUNICATIONS PRODUCT OF THE YEAR AWARD

Award Reflects Strong Customer and Market Feedback surrounding Grandstream's Powerful IP PBX that Delivers Enterprise-Grade Features to SMBs with No Licensing Fees

Boston, MA (June 24, 2014) – – [Grandstream Networks](#), the leading manufacturer of IP voice/video telephony and video surveillance solutions, announced today that [TMC](#), a global, integrated media company, has named the UCM6100 series IP PBX Appliance as a recipient of a 2014 *Unified Communications* Product of the Year Award.

“We are thrilled to receive this award from TMC as it further validates the market’s overwhelmingly strong response to our UCM6100 series IP PBX Appliance,” said David Li, CEO of Grandstream Networks. “This exceptional product is bringing traditionally enterprise grade features to SMBs in way not seen elsewhere on the market, and therefore enables them to compete with larger companies. This award lends recognition to the ongoing need for innovative, feature-rich and affordable Unified Communications solutions geared towards the SMB marketplace.”

The [UCM6100](#) series is a revolutionary IP PBX for the SMB market as it offers state-of-the-art enterprise-grade voice, video, data, and mobility features in an extremely easy-to-manage fashion with no licensing fees or costs per feature. SMBs can now compete with larger companies because the UCM6100 series helps to ease the key factors SMBs usually face when purchasing an on-site IP PBX solution including feature content, cost, ease of installation and maintenance, customer application, total cost of ownership, reliability and support. Available in 4 model sizes and based upon an enhanced version of the popular open source Asterisk platform, Grandstream’s UCM6100 series is a powerful IP PBX appliance that supports up to 500 users, 60 concurrent calls, 6 conference bridges, and 32 conference participants. For the starting price of an entry-level PC, the UCM6100 incorporates advanced voice, video, data, and mobility features typically found in expensive IP PBX systems for larger enterprises but offers them in an innovative, extremely easy to use fashion at a potentially disruptive market-leading price point for the SMB market.

“I’m excited to proclaim Grandstream as a 2014 recipient of TMC’s Unified Communications Product of the Year Award for their innovative product, the UCM6100 series IP PBX Appliance,” said [Rich Tehrani](#), CEO, TMC. “Our judges were very impressed with the ingenuity and excellence displayed by Grandstream in their groundbreaking work on the UCM6100 series IP PBX.”

Winners of the 2014 *Unified Communications* Product of the Year Awards are featured on [TMCNet.com](#).
