

# GAC2500

## What Makes it Great?

### Conference with Android Apps; Bridge Android with SIP

Hold conferences through popular Android apps and even bridge Android app calls into SIP conferences

### Sync Bluetooth Devices and Use Bluetooth Headsets

Sync with any Bluetooth-compatible device for audio and exchanging of contacts and calendars

### Easy Use with a Touch-Screen Android Interface

The device is operated using a familiar and intuitive Android interface delivered on a 4.3" touch screen.

### Start a Conference Anywhere at anytime

We have built a 7-way conference bridge into the GAC2500. This allows you to hold a 7-way voice conference at anytime, anchored by the GAC2500.

### Hold or Join a Conference from Anywhere

Built-in Wifi allows the GAC2500 to be portable – take it anywhere, plug in the power adapter, connect to wifi, and you are ready to conference.

### Communicate Quickly, Clearly and Securely

By combining these features with Full HD audio, Gigabit ports, PoE, daisy-chain support and TLS/SRTP encryption technology, the GAC2500 offers features and functionality not found in other business conferencing devices.
