UCM Series
IP PBX Solution

About the UCM Series

The anchor to any IP unified communications solution, our UCM IP PBX series delivers a stunningly powerful yet easy to manage voice, video, data and mobility platform. Businesses can unify multiple communication technologies, such as voice, video communications, video surveillance, data tools, mobility options, and facility access management, all into one management platform. Through its award winning history and thousands of deployments, the UCM series has proven to be the go-to unified communications platform.

Product Positioning

The UCM series of IP PBXs deliver market-leading technology at an affordable price for small-to-medium businesses and enterprises. With an array of VoIP, conferencing, surveillance, mobility, and data management features, this on-premise solution enables businesses to do more with their communications. The UCM's robust feature set is perfect for office, call center, hospitality, commercial, and residential deployments. With no licensing fees and free firmware upgrades for life, the UCM series is an easy choice.
